## Bat Pest Control Services in Utah

---

If you suspect a bat colony in or around your home or business, it is important to call an experienced **bat control** company to keep you, your family and your pets safe. Bats roost in crawl spaces, attics, barns and other structures and have been known to fly through an open window at night putting you and your family at great risk. A bite from a bat is especially dangerous because many people who have been bitten do not even realize it and do not seek immediate medical attention. Bat infestation dangers may come from a bite, scratch or inhaling bat mucous or guano is the very real risk of contracting rabies or histoplasmosis.

Protected by Utah law, **bats should be professionally removed, the roosting area should be cleaned, and disinfected and exclusion methods must be employed to prevent their return.** The state certified experienced professionals with **Legacy Pest Control Utah** will **work with you to develop a customized bat removal and exclusion plan.** Give us a call at 801-779-3131 for guaranteed safe and effective bat control.
