Farr West Pest Control and Extermination Services:

[Ant Pest Control:](#)

There exists many types of ants that can infest your home or business. Some can even damage the wood frame. It is easiest to find them in places where they can gather undisturbed or where they have easy access to food. Our Legacy Pest Control technicians spray for all sorts of ants, typically around doors, windows, and baseboards both inside and outside.

[Cockroach Pest Control:](#)

Many people fear cockroaches because they are known for being difficult to eradicate once they've entered your home or business. Typical over-the-counter treatments will not solve the problem, but our technicians can get rid of the problem once and for all.

Earwig Pest Control:

Earwigs, although harmless, are a nuisance. Our experts are able to spray areas where these bugs might be entering and also eliminate outside factors that may attract them.

Termite Pest Control:

Termites are known as the pests that can damage the wooden structure of your home. If not caught within a timely fashion, these pests can cause serious damage with costly repairs. Fortunately, our technicians can evaluate your home or business and show you where you may be susceptible to termites as well as remove the current infestation.

Silverfish Pest Control:

These pests are typically found in wet, humid areas. Our technician can easily take care of any silverfish infestation with a noticeable decrease with just one visit.

Spider Pest Control:

Although most spiders are harmless, there do exist a few dangerous types in Utah. Many people find a spider infestation troubling because they simply do not like them. We can eliminate this problem.

Bed Bug Pest Control:

Bed bugs are a serious nuisance for people all across the country. They feed on the blood of their victims and leave itchy bites. These pests generally need to be treated by a professional pest control service.

Why Decide on Legacy Pest Control for Your Farr West Exterminator?
