Salt Lake City Pest Control and Extermination Services:

Ant Pest Control – Ants invade our homes in search of food, and when they find a source you have an infestation on your hands. Your efficient and courteous Legacy Pest Control Technician will **find the problem areas, identify the ant species and conduct a controlled extermination and prevention by treating around doors, windows and baseboards** inside and the outside parameter.

Spider Pest Control – A spider infestation, especially for those with arachnophobia, can be an unnerving and scary experience. While most spider species are harmless to humans, there are a few dangerous breeds found in Utah. We will **inspect the entire**

home or building and safely and efficiently eliminate all spiders and spider nests.

Earwig Pest Control – Exterminating an earwig (pincher bug) infestation must include preventative treatment and removing compost or other debris away from the structure to ensure they won't return. Legacy Pest Control provides commercial and residential earwig control with an ***inspection of the property and safe removal through extermination and preventative treatments.***

Termite Pest Control – Destructive termites can cause costly damage to your home or office. ***It is vital to employ an experienced professional termite exterminator to stop termites dead in their tracks.*** Our technicians will perform an ***extensive inspection to locate termites and to identify other areas that may be susceptible*** to an infestation. We will quickly eliminate the current infestation and provide preventative measures and treatment options to keep your home or office safe.

Bed Bug Pest Control – Across the US, bed bug infestations have become a huge problem and pose a threat to every member of your family. These tiny parasitic insects feed on human blood and leave red, itchy bumps on the skin. ***A skilled bed bug pest control expert can determine their presence by looking for indicators like bed bug feces and cast skins.*** Use a professional exterminator, like Legacy Pest Control, to get rid of a bed bug infestation quickly and safely.

Cockroach Pest Control– Although they are notoriously hard to get rid of, Legacy Pest Control offers ***safe cockroach extermination, guaranteed!*** There is nothing more disturbing than turning on a light or moving something only to find a cockroach scurrying out of sight. Avoid a prolonged infestation by trying to get rid of these diseased insects on your own with over the counter treatments, call the experts at Legacy Pest Control in Salt Lake City to ***quickly eliminate cockroaches for good.***

Silverfish Pest Control – Often found in wet, humid areas, silverfish have a metallic appearance and fish-like movements. ***Schedule a home inspection to correctly identify a silverfish infestation and have these creepy little creatures safely removed from your home.*** Our pest control technicians will perform an initial child and pet-safe spray treatment and determine the number of additional treatments needed from the results.

Why Choose Legacy Pest Control in Salt Lake City, Utah

From our ***convenient and affordable service plans to our 30-day money-back guarantee***, Legacy Pest Control is known across the Wasatch Front as a ***trustworthy, reputable pest control service*** in Salt Lake City, Utah. Our innovative pest control methods include a combination of ***customized*** treatment materials, application methods, and techniques to provide you with the safest and ***effective*** pest control available.
